PREPARED UNDER ORD-0266 · FRANK'S GAME PLAN

The Estate of Raffi Ceylan

The complete record — one death, three filings, one settlement, and every document that is missing

Every quotation in this package is reproduced from a file that exists on this machine and is named beside it. Every figure is either printed on a document or is arithmetic shown on the page. Nothing is filled in, and nothing is inferred silently.

Where a document is named in the record and not held, the annex says so on its own page and lists it again in the gap table at the end. Every fax number in Part III was read off the organisation's own page on 17 November 2026 and carries that page's URL.

HOW IT IS DELIVERED	By fax, to published numbers only, each read off the receiving organisation's own page — police services, attorneys general, solicitors general, courts and registries, oversight bodies, media, and the Canadian Armed Forces, across Canada and the United States. Nothing has been sent under this order.
PREPARED FOR	Frank Longo

PART III — THE VERIFIED FAX LIST

Every in-bucket organisation by country and by desk, each with the page URL the number was read from; the appendix of numbers outside the counted buckets; and the batch files for sending.

1. A man goes camping

On 14 July 2016 Raffi Ceylan, 43, a contractor from Amherstburg, Ontario, went camping at Top Lake with his son, his girlfriend, and others — twelve people in all, seven adults and five children. On the morning of 16 July he fished in the dark, had breakfast, went four-wheeling with friends, picked blueberries, went four-wheeling again with his son, and ate lunch at the campsite. Then he went into the recreational vehicle where his girlfriend was lying down. He closed the door. Once inside, he fell to his knees and made a gurgling noise. She yelled for help. A friend came in and started CPR. He vomited and the vomit had to be scooped out of his mouth. His lips were turning blue. The friend tried to drive the RV out and got it stuck on Island Lake Road, turning the wrong way. The ambulance came. Resuscitation continued in the ambulance, a patch was made to the hospital in Sudbury, and Raffi Ceylan was pronounced dead at 16:33 on 16 July 2016.

That account is not a reconstruction. It is the Coroner's Investigation Statement, Form 3, CIS Case No. 2016-8196, coroner Dr. Bishwajit Bora, quoted from its own narrative:

> "Mr. Raffi Ceylan was a healthy 43-year-old male who died suddenly while camping."

And in the same form's fields, two things the rest of this story will keep coming back to. First: **"Environment: Motor Vehicle - Passenger"** — for a death that the same form places inside a stationary RV at a campsite. Second: the form names "his girlfriend" and "a friend" and gives no name for either. The record never does name the friend who did the CPR.

2. A death certificate that says nothing was found, and a cause of death anyway

The Form 3 records the death as natural, the medical cause as **"Probable Primary Cardiac Arrhythmia"**, the fields beneath it — "Due to / as a consequence of", "Contributing Factors" — left empty.

The autopsy, ten weeks later, says something different in its own words. Final Autopsy Report 16:SA198, Health Sciences North, Sudbury, examination commenced 19 July 2016, signed by Dr. Martin Queen on **7 November 2016**:

> "NO ANATOMICAL or TOXICOLOGICAL CAUSE of DEATH Consistent with CARDIAC ARRHYTHMIA"

Read those two documents together. One assigns a cause of death. The other states that no anatomical or toxicological cause was found. They are compatible only if "consistent with" is treated as the finding of cause. No document in the record explains that step.

The supporting science is thinner than the conclusion. Four items went to the Centre of Forensic Sciences (CFS File 2016-001036); the analytical summary is dated 28 July 2016, the evidence list printed 29 July 2016. Two of the four were reported. The rest, in the record's own words, **"have not been tested."** Vitreous chemistry was run on 23 August 2016; the values exist, and they are not legible in the copy held.

The genetic test — GeneDx Cardiology Genetics Report, accession 1638665, dated 14 October 2016, faxed that morning at 11:09:55 EDT — found a variant in the ANK2 gene and classified it in the report's own language as a **"Variant of Uncertain Significance"**, adding that the result **"cannot be interpreted for diagnosis."** The Regional Supervising Coroner, Dr. David A. Cameron, wrote to the widow about it:

> "This means that no abnormalities were found and so a cardiac arrhythmia is the most likely cause."

So: no anatomical cause, no toxicological cause, no usable genetic cause, and a cause of death all the same.

3. The clock in the record does not run straight

Three small things sit on the face of the documents, and each of them is checkable in a minute.

The autopsy report's opening paragraph says the examination was made **"on the 19th day of July, 2016 about 45 hours after death pronounced"**. Death was pronounced 16 July at 16:33; the examination commenced 19 July at 13:30. That is **68 hours 57 minutes**. Forty-five hours after 16:33 on 16 July is 13:33 on 18 July, a day before the date printed in the same sentence.

Rigor mortis. The emergency physician, as the coroner records him, noted at Chapleau that the body had **"blanching lividity and partial rigor mortis"**. The coroner, examining at the Forensic Pathology Unit on 19 July, records **"Lividity was fixed, Rigor mortis was partial"**. The autopsy report's "State of the Body" records **"Rigor Mortis: present"**. Same body, same week, one word different.

And the Form 3's own coroner signature and date fields are empty.

None of this proves a crime. It is the ordinary furniture of a record that was completed in a hurry and never reconciled with itself — and every later document in this story is built on top of it.

4. Fifteen years of one man's paperwork, and then a single filing

Turn now to what Raffi Ceylan owned, because that is where the story changes register.

The Ontario Ministry of Public and Business Service Delivery Profile Report for **NORTHERN EXPOSURE DECKS & FENCES LTD.**, Ontario Corporation Number 2003951, incorporated 28 June 2001, "a true copy of the record", generated 6 November 2026, carries a Document List of thirteen filings. Twelve of them name one person as the Person Authorizing Filing:

> "Annual Return - 2013 · PAF: RAFFI CEYLAN - OFFICER · July 05, 2014" "Annual Return - 2004 · PAF: RAFFI CEYLAN - DIRECTOR · February 18, 2006" "CIA - Initial Return · PAF: RAFFI CEYLAN - DIRECTOR · July 20, 2001"

Fifteen years, incorporation onward, every filing his.

The thirteenth line is the only one in the list that does not name him:

> "CIA - Notice of Change PAF: BARTON J. SEGUIN - OTHER Effective Date: September 30, 2016"

Barton J. Seguin is a Windsor lawyer. The registry classifies him as "OTHER" — the code for a person holding no office in the corporation. On the strength of that filing, as of 31 December 2016 the corporation's board is one person, the minimum the Act allows, and that one person is also President and Secretary:

> "Name: IVANA HRVATIN · Position: President · Date Began: September 30, 2016" "Name: IVANA HRVATIN · Position: Secretary · Date Began: September 30, 2016"

Ivana Hrvatin — Ivana Ceylan — is Raffi's estranged wife. She had held no recorded office in the company before 30 September 2016, and after that filing nothing further is filed in Raffi's name at all.

The registry report does not say when Raffi ceased to be a director, because it has no former-director field. It carries no share capital, no shareholder, no share transfer. The instrument behind the Notice of Change — the resolution, the consent to act, the signature — is not in the report and is not anywhere on this box. What exists is the filing and its date.

5. $607,228.70, and three accounts of where it went

Raffi Ceylan had a life insurance policy with Sun Life. On or about 19 September 2016 its ownership was transferred, by a form bearing a fax stamp of 2016/09/14. **That form is not held in unredacted form.** The family's affidavit records that the lawyer for the estate undertook to produce it unredacted and did not. Its fields — policy number, designation, signature, date signed, who signed — are therefore not established anywhere in this record.

The money is a different matter, and the record disagrees with itself about it three ways:

- The Longo affidavit, ¶F.1: Sun Life "processed a transfer of CAD $607,228.70 directly to Ivana Hrvatin" on or about 19 September 2016.
- The family's exhibit note: "$607,228.70 deposited October 31, 2016."
- A TD Canada Trust **business chequing** statement in the name of NORTHERN EXPOSURE DECKS & FENCES LTD., account 0084 7411-5001963, carrying a deposit line of "607,228.70", monthly average credit balance $19,240, next statement date 30 November 2016.

Only the third is a primary record, and it says the money went into the **company's** account, not to a person. The account reconciles exactly from its own lines: the balance was overdrawn by $10,686.32 immediately before the deposit and stood at **$596,441.78** immediately after it, with $100.60 of charges. And the average monthly balance of $19,240 proves the $607,228.70 did not stay: it left inside the statement period. Where it went is not in this record.

Two figures on the same statement and the same period are worth naming because they do not close. Copy B of the statement prints a line reading **"607,842.40"** — neither the deposit (difference $613.70) nor the closing balance. No line of readable text says what it is. And the sheet the estate's lawyer put in front of Raffi's mother in November 2016 (below) records the Sun Life proceeds as **$634,978.15**, which is **$27,749.45** more than the bank received. Neither figure is explainable from this corpus, and neither is used in any arithmetic here.

6. The meeting in the lawyer's office, on tape

On 16 November 2016, Betty Ceylan — Raffi's mother — and Julie Triferis, his live-in girlfriend at the time of his death, met Barton J. Seguin in his office. Julie Triferis recorded it, with Betty's permission, in her own written account:

> "With Betty's permission I told her I was going to voice record our entire meeting with Bart. And I did so!"

The audio is not on this box. What is, is a partial transcript covering 19:38 to 32:10, annotated by hand by the family. Taking only the transcript lines:

> "@19:38 — Mom 'Ok how is she going to pay this' … what insurance?" "@20:11 — Bart 'Her name is not there'. @20:14 — Mom 'how come it is there now'? @20:15 — Bart 'It's not, it's not, it's with the company'."
>
> "@21:03 — Bart '… if something will show that she is taking the money, I have an obligation to stop it. Right. I will not tolerate anything that'll be illegal. I can't. That's my livelihood. So I can assure you, that there is nothing that is been put together that'll show her as having a personal interest in this money at all.'"
>
> "@23:19- Mom " now, the tax, the income tax". Bart " There is no income / tax" … "It's with the life insurance company"."

And Seguin's own summary of the policy:

> "Raffi had a policy on his life that was owned by his [corporation]… the corporation is the beneficiary… Everything has been received in trust, and put in an account that is showing to be in trust for Ashton or its in the company."

He then put a two-page "LIST OF ESTATE ASSETS/DEBTS" in front of them — personal on page one, corporate on page two — and walked them through it. That is the document carrying the $634,978.15. It also carries an overdraft of $25,664.47 on the same account "paid out of funds received", and $35,289.86 in listed business liabilities.

Later in the same meeting the talk turns to the house Raffi and Darrell Lauzon bought together, and Seguin says something the transcript keeps:

> "How do we prove it, without Darrell acknowledging it? If Darrell gives us something that says that out of the x amount of dollars... **I know what came in cuz i closed the deal**."

He closed the real-estate deal. He is also the lawyer advising the estate on its half of that property at that meeting.

Two strands hang off this meeting and neither is closed. Julie Triferis attests in writing that Seguin took Raffi's computer from the house the day she moved out; her account says Seguin later told her so, and says Ivana had it. No document in the corpus corroborates or contradicts that. And the meeting's audio, which is Exhibit 19 of the later pleading package, has never been produced in full.

7. The objection

On **16 February 2017** Betty Ceylan filed a Notice of Objection to Ivana Ceylan (Ivana Hrvatin) acting as estate trustee of Raffi's estate, and followed it with an Application in **Court File No. CV-17-25300**, Ontario Superior Court of Justice at Windsor. That date appears twice independently — in the later Minutes of Settlement, ¶5, and in Frank's own request to the courthouse.

The Objection itself is **not held**. What is held is the opposing counsel's letter of **28 April 2017** — McTague Law Firm, D. M. Sundin, to Barton J. Seguin, marked without prejudice — which encloses a copy of it and states its ground in one sentence:

> "Betty is willing to settle her dispute regarding **Ivana's authority to be either the beneficiary or the Trustee** of Raffi's Estate on the following terms:"

Either the beneficiary or the trustee. Both were in issue.

The letter carries twelve terms and a ten-day deadline. The ones that matter: an Application on consent declaring that Ivana is **"specifically excluded from acting as Estate Trustee or taking as a beneficiary"**; **"an independent party, agreed upon, appointed Estate Trustee"**; all of Raffi's personal effects surrendered to that trustee; **"control of Raffi's social media accounts surrendered to Lucy Ceylan"**; Betty's costs paid by the estate; supervised visitation between Ashton and Raffi's family; reimbursement of two named people who had paid the estate money or worked for it; and the return of a calligraphy pen and ink case described as a family heirloom, a camera, a painting, and lumber.

Term 2 of that twelve is missing from the record: the page break falls across it.

8. What was signed instead

The Minutes of Settlement are dated **as of the 9th day of December, 2017** [OCR: `9"`], between Bercuhi (Betty) Ceylan and Ivana Hrvatin, witnessed by each party's own lawyer. Term by term against the April offer:

- ¶7: "Betty shall forthwith withdraw the Objection;"
- ¶9: an Order declaring **Ashton is the sole beneficiary** of the estate, with a trust under ¶4(c) of the 2007 will.
- ¶10: **"(i) Ivana shall be the Trustee of the Trust"**, with no compensation, and an annual financial update to Betty and to the Office of the Children's Lawyer.
- ¶13: "The Estate shall make payment to Betty of the all-inclusive sum of **$60,000.00**, on account of Betty's Claim for recovery of certain loans she made to Raffi and on account of costs for the Application;"
- ¶14: "Within thirty days, Ivana shall cause Raffi's Facebook page to be shut down;"
- ¶15: a tombstone at Raffi's grave by 1 June 2018, estate-paid, with the words "Beloved Son, Brother, and Father";
- ¶16: a lithograph appraised, and if worth more than $500 turned over to Ivana "who shall preserve it for Ashton";
- ¶17: "Ivana shall release a certain calligraphy set to Betty forthwith";
- ¶22: confidentiality — the parties "shall indicate only that the 'litigation has been discontinued'".

The exclusion is gone. The independent trustee is gone. Social media control for Lucy became deletion by Ivana. The camera, the painting, the lumber, the two reimbursements, the death certificate: gone. Three of four heirloom items gone. What was asked in April 2017 and what was signed in December 2017 are not the same document, and no document in this record explains the difference.

The Minutes predate the probate certificate. In **December 2017** Ivana Ceylan swore the application (Form 74.4) and the court issued the Certificate of Appointment of Estate Trustee with a Will, sealed 2017, naming her estate trustee, with the will dated 11 November 2007 attached. Her counsel of record on that application: Barton J. Seguin, Shibley Righton LLP, the lawyer who sat in the November 2016 meeting.

And on **13 March 2018**, Howard J. made the Order on consent, ¶2 of which reads:

> "THIS COURT ORDERS that the Estate shall be administered without reference to paragraphs 3 and 4(b) of the Last Will and Testament of Raffi Ceylan, dated November 11, 2007 (the 'Will'), which shall hereby be of no force or effect…"

Paragraph 4(b) is the residue clause that gave the residue to his wife. Four months after probate certified that will, a court order by consent annulled it and routed the residue into the trust for Ashton. The will probated in December 2017 was not, in the end, the will that governed.

Paragraph 3 of the will is struck by the same order and is not readable anywhere in this corpus: the only page-3 OCR is corrupted and carries ¶4(c) text instead.

9. The arithmetic

Two figures sit fourteen months apart, and both are the family's own.

The estate was sworn to the court in December 2017 at **$108,114.00** (E-18).

The estate's asset-and-liability sheet from the first weeks after the death — the one handed over in Seguin's office on 16 November 2016 — records the Sun Life proceeds as **$634,978.15 "received"** (E-12).

```
634,978.15  −  108,114.00  =  526,864.15
```

The insurance proceeds recorded on the estate's own sheet exceed the whole estate sworn to the court by $526,864.15. Part of that is explained on the face of the documents rather than by concealment: Form 74.4's own printed instructions exclude insurance passing by survivorship or by designation from the estate value. What is not in this record is the instrument that shows which of those it was — the designation itself, gap G-01. Nor is there any accounting anywhere in this corpus that reconciles the two figures item by item.

The same sheet prints its own totals: **total estimated personal estate $167,488.09** and **total estimated business estate $167,176.38**, against **business liabilities $35,289.86** and an **overdraft of $25,664.47 "paid out of funds received"**. Every one of those four figures is legible; the lines that make them up are not, and no computed total is carried out of them here.

Against the $108,114.00 sworn:

```
$60,000.00  to Betty, all-inclusive (¶13)   = 55.50% of the sworn gross estate
$48,114.00  the most that could reach Ashton's trust, before debts,
            testamentary expenses and two sets of legal fees (¶8)
```

And Betty's own loan claim, as pleaded in the Mediation Brief of the Applicant dated 5 December 2017, was **$58,512.16** — 54.12% of the sworn estate. The $60,000 payment exceeds that claim by $1,487.84, which is arithmetic on the two figures, not a costs figure quoted from any document.

The 167-page Mediation Brief itself was found inside a single JPEG in the family's holdings. It is the only place in this corpus where the applicant's case is set out at length.

10. What the record does not say

This is the part that keeps the story honest, and it is as much a part of the story as the rest.

- **The unredacted Sun Life transfer-of-ownership form** — the one document that connects the policy to the deposit — has never been produced. Undertaken, not delivered.
- **The instrument behind the 30 September 2016 Notice of Change** — who signed what, on whose authority an "OTHER" filed a change of directors and officers — is not produced anywhere.
- **The share register** — whether the shares moved and to whom — is not in this record. The registry snapshot has no share field.
- **Who controlled the TD account after 16 July 2016** — the signing authority — is not in the statement held.
- **The Notice of Objection of 16 February 2017 and the Statement of Issues in CV-17-25300** were requested from the courthouse and have not arrived. The Objection's own grounds, exhibits and signature are unknown here; only opposing counsel's one-sentence description of them is held.
- **The estate's administration accounts, the trust deed, the trust's annual updates from 31 March 2019 onward** — required by ¶10 of the Minutes and ¶2 of the Order — do not appear anywhere in this corpus. No accounting was ever produced into it.
- **Whether the $60,000 was paid, when, and from what account** is not evidenced by any receipt, cheque or estate bank record here.
- **The tombstone, the Facebook page, the lithograph appraisal, the calligraphy set** have no compliance document. Neither fulfilment nor breach is provable from this record.
- **December 2016 is empty.** Searched; no document in the readable corpus is dated in it.
- **The EMS run report, the dispatch log, the OPP post-mortem photographs, the scene DVD, the Chapleau Health Services emergency record** — all named in the autopsy report or the Form 3, none produced.
- **The full audio of the 16 November 2016 meeting** — Exhibit 19 — has never been produced, only a twelve-and-a-half-minute partial transcript.

11. The frame: three cases, one pattern

Frank Longo's position, carried here as his position and over his name, is that this is one of three cases that belong together — the trifecta: Raffi Ceylan's estate; Frank's own case; and Dave Simetic's case. The pattern he names is the same in each: a person's affairs move on paper, by someone with no recorded authority, and every institution that is asked about it answers without disputing the facts.

That frame is Frank's reading, and the record either carries it or it does not:

- **Raffi's case** is set out above in six built nodes, each with its own source list, its own arithmetic re-run at the shell, and its own named gaps. It is the only one of the three that has been built to this standard.
- **Dave Simetic's record** is **not assembled**. A sweep was ordered (SIMETIC FULL SWEEP, 14 November 2026) and its deliverable directory does not exist on this box. His name appears inside documents rather than on them; the inventory, the date-ordered record, the office-by-office trail and the gaps list have not been produced. Nothing about his case is asserted in this document.
- **Frank's own case** exists here as a large, scattered evidentiary corpus — filings, agency responses, delivery ledgers, recordings — but not as a built chain with nodes, receipts and named gaps the way Raffi's is. It is not summarised here, because a summary would be a claim this document cannot receipt.

So the honest shape of the package is this: **one case told in full, and two named as pending rather than borrowed.** The trifecta is the reason to read the first one. It is not a licence to describe the other two as if they had been proven here.

12. The demand

What the record supports, stated as narrowly and as hard as it can be:

1. A healthy 43-year-old man died at a campsite in July 2016 with no anatomical or toxicological cause of death found, and a cause of death assigned anyway.
2. Fifteen years of one man's corporate filings end at a single Notice of Change dated 30 September 2016, authorized by a person the registry classifies as holding no office, after which his estranged wife holds every office the Act requires and nothing further is filed in his name.
3. $607,228.70 of life insurance entered the corporation's business account in the autumn of 2016 and left it inside the same statement period. The document that would show who was entitled to move it has never been produced.
4. On 16 February 2017 his mother filed a Notice of Objection to the wife acting as trustee and taking as beneficiary. By the settlement of 9 December 2017 the wife remained trustee of the child's trust, two paragraphs of the probated will were struck by consent, and the family was paid $60,000 all-inclusive out of an estate sworn at $108,114.
5. The insurance proceeds the estate's own sheet records at $634,978.15 exceed by $526,864.15 the entire estate sworn to the court at $108,114.00, and no accounting in this record reconciles the two.

Two demands follow, and they are the same two on the cover of the fax packet already in circulation: **investigate the movement of this estate and this money**, and **put the $607,228.70 back to the Estate of Raffi Ceylan** — or state in writing, signed, why not.

13. The reaction is the proof

Everything above is a record of what happened to one family's money. This section is different: it is the record of what happened when the record itself was published.

Frank Longo's position, carried here as his position and over his name, is that the two are the same case, and that the second one is the proof. His words, as he gave them on 17 November 2026:

> The Gate, the suppression, the full-out suppression — and the results of the suppression are the proof of their guilt. If they are the only ones bombarding and monitoring a site nobody knows about, then it is them attacking it. A very small sliver might be genuine people who get rejected; the rest is them monitoring, because the world does not know what Frank is about to show them.

The record under that position is on this machine and it is measurable. It is not a claim about intent; it is a count of who fetched what.

Every document Frank has sent to an institution since February 2026 has carried a canary token — a unique URL that reports back to a logging service the moment anything opens it, recording the source address, the city that address renders to, and the time. There are **1,328 fired campaign tokens**. Pulled from the token service's own per-token history API on 13 November 2026 at 15:54 EST — not from alert mail, which undercounts: the mailbox sweep saw 2,531 firings, the pages show **3,421** — the ledger reads:

```
campaign tokens fired          1,328
firing rows                    3,421
distinct source addresses        571
distinct rendered cities         125
first firing (EST)      2026-02-16 00:28:49
last firing  (EST)      2026-11-13 15:34:42
```

Those firings are not anonymous. They sort by the house the instrument was addressed to:

- **Legislature / MPs — 872 firings** across 402 tokens. Distinct egresses: **19**. Distinct cities: **6**. Of 872 firings, **863 render Toronto** and **864 come off Microsoft egress**. A whole parliamentary batch opens from one estate.
- **Sun Life — 267 firings**, 21 egresses, **4 cities**, **190 of them on Netskope** — a corporate secure-web-gateway, i.e. the company's own filtering layer fetching the document on its behalf.
- **Municipal — 579 firings** over 238 tokens, **214 egresses**, **55 cities**: the widest footprint in the ledger.
- **Newsroom — 165 firings**, 88 egresses, **36 cities**: the most dispersed per token.
- **Ombudsman — 100 firings**, 24 egresses, 8 cities. **PMO — 114 firings**, 31 egresses, 4 cities.
- **Attorney General — 62 firings**, 21 egresses, 3 cities. **Solicitor General — 46 firings**, 16 egresses, 2 cities.
- **OPP — 29 firings**, 14 egresses, 5 cities. **Windsor Police — 71 firings**, 13 egresses — a department that is not on any list this package sends to.

Read the shape, not the names. The documents went to institutions that had no public reason to know the site existed, and the fetches cluster by house: one estate per institution, one city per batch, one corporate proxy per insurer. A site nobody had been told about was opened **3,421 times, from 571 addresses, in 125 cities, over nine months**, before any of it was public.

Frank's reading of that is blunt and it is his: a small number of those openings will be ordinary people who followed a link and rejected what they read — he says so himself, and this package does not hide it. The rest, on his reading, is monitoring, because the material was not public and there was no other way to find it.

What this section proves and what it does not. It proves the fetches happened, where they came from and when; the ledger, the per-token pages and the geography clusters are held at `/home/atlas/CANARY-EVAL-2026-11-13/deliver3/` (`token-geography-summary.md`, `token-geography-ledger.csv`, `token-geography-tokens.csv`, `_numbers.json`) and every figure above is read from them. It does **not** prove who sat at each address. Attribution past the egress is a separate question and is not asserted here. The step from "they were watching" to "they are guilty" is Frank's position, stated as his, over his name — and the reader is handed the counts to test it.

14. Why this goes to Canada first

Frank's instruction for this package is that it goes out first to Canada — to the police services, and to the military as well. His words:

> Look and see what your government is doing. If you want to do something about it, all the power to you. If you don't, and you like living like this, all the power to you as well.

The reason it goes to institutions rather than to a newspaper is in the numbers above. The institutions are already in the ledger. Whatever else is true, they read the file. A letter to a newsroom is a hope; a fax to a police service whose egress is already in the token ledger is a delivery to a reader who has been reading for nine months.

The warning Frank attaches to it is his, in his words:

> One day they will realize these motherfuckers have been stealing from you all this time — they don't let you say a word, they hide behind the law and their hypocritical ways, they arrest you, create a charge on you, create illegal terms on you, they bring the drugs into the country, they do everything illegally and hide behind the law. None of this would be a problem in this wonderful country if they weren't the criminals creating the criminal activities.

This package does not ask the reader to accept that. It gives the reader a death certificate with no cause on it, a corporate registry that shows a company changing hands on paper, a bank statement with $607,228.70 in and out inside one period, a settlement that struck out the clauses requiring an accounting, and a token ledger with the reader's own egress in it — and then two questions: investigate the movement of this estate and this money, and put the $607,228.70 back to the Estate of Raffi Ceylan — or state in writing, signed, why not.

15. The solution: HALO

A package that only indicts is a complaint. Frank's game plan carries a proposed mechanism, and it is not a slogan — it is software running on this machine, built local, at zero external spend, with no outbound connection to any model provider.

What HALO is. A knowledge engine built on a nine-node graph — the 3/6/9 structure: nine pillars (ingest, correlate, query, self-modification, persist, visual, voice, fractal, adapt) wired at offsets of three, so every node reaches every other within nine steps. The property that matters is not the numerology, it is the topology: the graph cannot dead-end, so no line of inquiry can be quietly dropped. A question is never lost because the traversal always has a next node.

How it works, in the order it works.

1. **Ingest.** Every document, email and recording is hashed, stored as a node and tied to its pillar — filings to *persist*, surveillance and IP evidence to *correlate*, communications to *ingest*, infrastructure to *fractal*.
2. **Resonance.** A question walks the graph nine steps along the strongest edges. The answer is assembled from the nodes the walk actually crosses, so the answer carries its own path.
3. **Builder–judge.** A local model writes the answer; a second local pass scores it 0–100; under 90 it is rewritten with the criticism attached. Nothing leaves the machine.
4. **Self-modification.** Paths that score well gain weight; stale paths decay. The system learns which reasoning routes produce defensible answers, and keeps the receipts for that learning in the graph.
5. **Query and voice.** The same graph answers spoken questions and returns the documents behind an answer, not a summary of them.

Applied to everyday life, to social media, and to the law. The point of a graph that cannot dead-end is that it applies to any record a citizen is up against: a benefits file, a police complaint, a corporate registry, a court file, a bank statement. Point it at the record and it will not let a question vanish — it will either reach the document or report the gap, which is exactly what §10 of this part does by hand. In social media the same property is the answer to the thing described in §13: a platform whose decisions can be walked end to end, node by node, with the path shown, cannot bury a question without the burial being visible in the graph. In law it is the accounting that was never produced: every movement of money is a node, every node has an edge to the instrument that authorized it, and the missing instrument shows up as a hole rather than as a paragraph nobody checks.

Frank's claim for it, in his words:

> No harm in it whatsoever; only fairness, only balance, the way the scales of justice are supposed to be. The people lose nothing by getting rid of these tyrants; they gain prosperity, peace, love and honour; less turmoil, more benefits. The choice is theirs.

What is verified and what is not. The system exists and runs on this machine — `halo_369_core.py` over `toroidal_369.db`, the nine pillars and the 3/6/9 edge wiring, the builder–judge loop against local Ollama, and a separate semantic index (`case_index.db`) over the case corpus using `nomic-embed-text` at 768 dimensions. That is a build, not a promise. What is **not** claimed here: any measured effect of HALO on any institution, any deployment inside a platform or a court, or any result beyond the case work on this box. Those would be claims this package cannot receipt, and it does not make them.

16. The close

Frank's closing words, carried verbatim and over his name:

> The evidence is true and it is real and it is their own — they did it all; all I did was record it. One can't sit here and make up imaginary recordings. This is real life: live recordings, evidence, their actions in real time, their actions with the computer, the cryptographic cards, the emails, how they don't sit right, the fake responses that make it look like they are following the law and you are not — all of it controlled in a realm you think you're in, which is not reality. I've been screaming into a bubble that nobody can hear — and so would every other citizen. And now it's been exposed.

That is what the reader is holding. Not an argument about what might have happened: a death certificate, an autopsy report, a registry filing, a bank statement, a settlement, a transcript, and a ledger of who read them. The documents are in Part II, each on its own page, each cited. Where the record is silent, the silence is named and listed. Where Frank's reading goes beyond the record, it is his reading and it says so.

The two demands stand, unchanged: **investigate the movement of this estate and this money**, and **put the $607,228.70 back to the Estate of Raffi Ceylan** — or state in writing, signed, why not.

Sources: `CHAIN-OF-EVENTS-2026-11-14/` *Nodes 01–06 with their own* `SOURCES.md` *files; the ORD-0262 production-line board (*`SYNTHESIS.md`*,* `DISCREPANCIES.md`*,* `MAP.json`*,* `SYNTHESIS.receipts.json`*);* `/home/muse/channel/lucy_ocr_out/` *OCR text corpus (519 files); the GeneDx report PDF held at* `NODE-01-JULY-2016/evidence/16SA198-CEYLAN-Raffi-MQ-GeneDx-6pp.pdf`*. The canary ledger in §13 is held at* `/home/atlas/CANARY-EVAL-2026-11-13/deliver3/` *(page pull of 13 November 2026, 15:54 EST). Every quotation above is reproduced from those files; every gap named in §10 is a gap in those files, not an omission from this text.*

Part II — The Evidence Annex

Every exhibit, in the order Part I presents it. Each sits on its own page. The original document is reproduced wherever this machine holds it as a file; OCR is reproduced and labelled as OCR wherever only OCR exists; and where the document is named but not held, the page says NOT HELD and gives the evidence that it exists.

E-01 · 16 July 2016 · Coroner's Investigation Statement (Form 3)

Document: CIS Case No. 2016-8196, Statement No. 2016-1034-B, coroner 20174 Dr. Bishwajit Bora. **Held as:** verbatim transcription in `NODE-01-JULY-2016/TRANSCRIPT-coroner-package-16pp.md`, package pages 2–3. Page photographs are not on this machine; the transcription is stated to be a transcription. **Status:** OCR/transcription only. Primary images not readable by this session.

> "Name: Ceylan, Raffi · Gender: Male · Date of Birth: 05/Feb/1973 · Age: 43 yrs"
>
> "Death Pronounced: 16/Jul/2016 By what means: Natural Death Municipality: CHAPLEAU · Address: Island Lake RD · City: CHAPLEAU Environment: Motor Vehicle - Passenger Death Factor: Natural Disease - Cardiovascular - Other"
>
> "Medical cause of death: Probable Primary Cardiac Arrhythmia" "Due to / as a consequence of:" — empty "Contributing Factors:" — empty
>
> "The girlfriend yelled for help and a friend attended in the RV. 911 was called and cardiopulmonary resuscitation was commenced."
>
> "He had blanching lividity and partial rigor mortis. A bruise was noted over the left eyelid."

Establishes: time and place of death; the group of twelve; that EMS attended and resuscitation was attempted; the recorded cause and manner; that the friend and the girlfriend are unnamed; that the coroner's signature and date fields on the form are empty. **Does not establish:** who the friend was; the EMS record; any conclusion about the bruise.

E-02 · 19 July – 7 November 2016 · Final Autopsy Report 16:SA198

Document: Final Autopsy Report, Northeastern Regional Forensic Pathology Unit, Health Sciences North, Sudbury. Examination commenced 19 July 2016, 13:30. Electronically signed MARTIN QUEEN MD FRCP(C) **07/11/16** — 7 November 2016. **Held as:** transcription, `NODE-01-JULY-2016/TRANSCRIPT-coroner-package-16pp.md`, package pp.1–5, 8. **Status:** OCR/transcription only.

> "on the 19th day of July, 2016 about 45 hours after death pronounced"
>
> "Temperature: Cold Rigor Mortis: present Postmortem Lividity: Posterior surface of body, fixed Decomposition: Nil"
>
> "NO ANATOMICAL or TOXICOLOGICAL CAUSE of DEATH Consistent with CARDIAC ARRHYTHMIA"
>
> "EMS was dispatched to the scene and attempted resuscitation in the RV and then in the ambulance. His wife reported that he had no significant medical history"

Establishes: the interval printed on the report's face; the state of the body as recorded at autopsy; the cause-of-death finding in the report's own words; the signature date. **Arithmetic on the record's own numbers:** pronounced 16 July 16:33 → examined 19 July 13:30 = **68 h 57 min**, against the "about 45 hours" on the same page. **Does not establish:** why the interval differs; why rigor reads "partial" at the scene and at the unit and "present" in the report.

E-03 · 28–29 July 2016 · CFS toxicology summary and evidence list

Document: CFS Toxicology Coroner's Case Analytical Summary, CFS File 2016-001036, 28 July 2016; CFS Evidence List Report, printed 29 July 2016, four items, all processed 19 July. **Held as:** transcription, package pp.6–7; OCR `lucy_ocr_out/`. **Status:** OCR/transcription only.

> Evidence List: four items submitted. Results returned for two; the remainder, in the record's own words, **"have not been tested"**.

Establishes: what was submitted and what was not tested. **Does not establish:** the values for the untested items, or why they were left untested.

E-04 · 23 August 2016 · Vitreous chemistry record

Document: vitreous chemistry electronic record, run date 23/08/16. **Held as:** transcription (package p.8); OCR. **Status:** the values are **not legible** in the copy held.

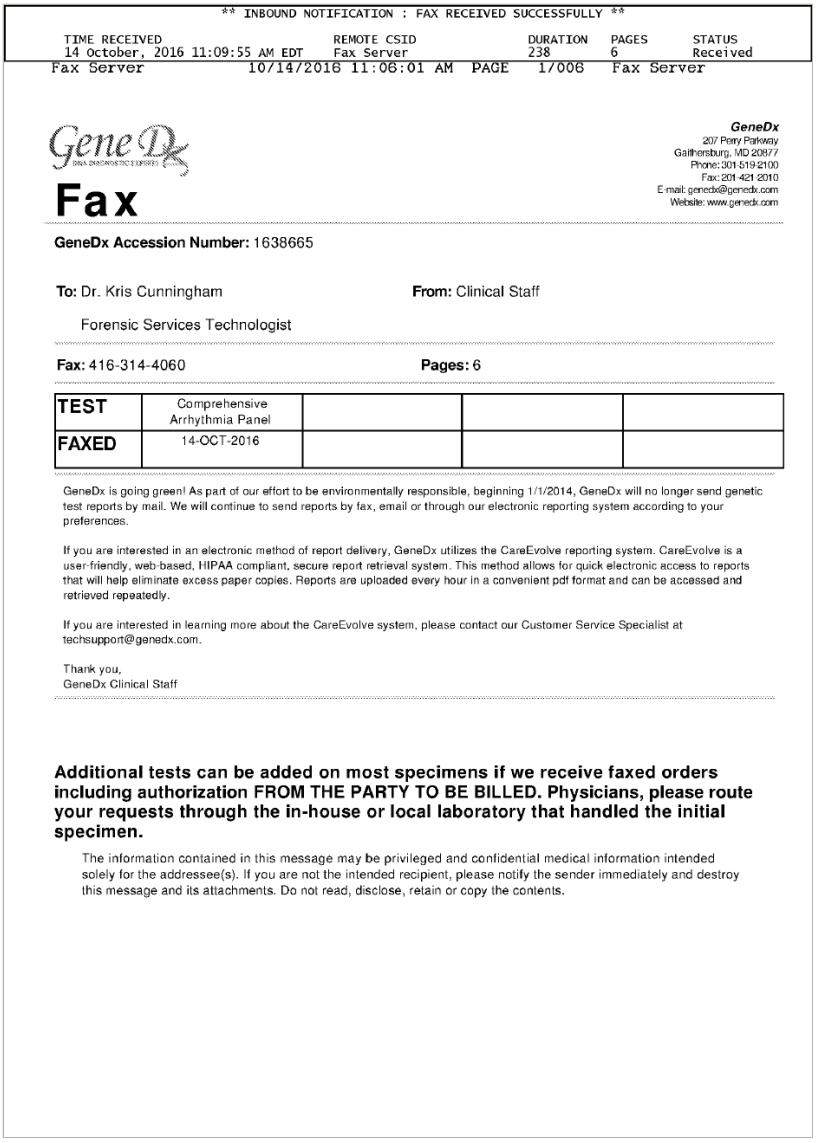

Establishes: that the test was run, five weeks after death. **Does not establish:** any value in it.

E-05 · 14 October 2016 · GeneDx Cardiology Genetics Report

Document: GeneDx accession 1638665, six pages, faxed 14 October 2016 at 11:09:55 EDT. **Held as: the document itself** — `NODE-01-JULY-2016/evidence/16SA198-CEYLAN-Raffi-MQ-GeneDx-6pp.pdf`. The six pages follow this page in this annex.

> ANK2 variant classified **"Variant of Uncertain Significance"**; the report states the result **"cannot be interpreted for diagnosis."**

Establishes: the classification, in the laboratory's own words. **Does not establish:** any causal link between the variant and the death. The report itself refuses that reading.

TEST	Comprehensive Arrhythmia Panel			
FAXED	14-OCT-2016			

GeneDx is going green! As part of our effort to be environmentally responsible, beginning 1/1/2014, GeneDx will no longer send genetic test reports by mail. We will continue to send reports by fax, email or through our electronic reporting system according to your preferences.

If you are interested in an electronic method of report delivery, GeneDx utilizes the CareEvolve reporting system. CareEvolve is a user-friendly, web-based, HIPAA compliant, secure report retrieval system. This method allows for quick electronic access to reports that will help eliminate excess paper copies. Reports are uploaded every hour in a convenient pdf format and can be accessed and retrieved repeatedly.

If you are interested in learning more about the CareEvolve system, please contact our Customer Service Specialist at techsupport@genedx.com.

Thank you,
GeneDx Clinical Staff

Additional tests can be added on most specimens if we receive faxed orders including authorization FROM THE PARTY TO BE BILLED. Physicians, please route your requests through the in-house or local laboratory that handled the initial specimen.

The information contained in this message may be privileged and confidential medical information intended solely for the addressee(s). If you are not the intended recipient, please notify the sender immediately and destroy this message and its attachments. Do not read, disclose, retain or copy the contents.

GeneDx report, page 1 of 6 — original document, from 16SA198-CEYLAN-Raffi-MQ-GeneDx-6pp.pdf

Cardiology Genetics Report

Patient Name:	**CEYLAN, Raffi**	**GeneDx Accession No:**	**1638665**
Date of Birth:	**05-FEB-1973**	**Date Specimen Obtained:**	**16-JUL-2016**
Specimen Type:	**DNA**	**Date Specimen Received:**	**16-SEP-2016**
Submitters ID No:	**16SA198 MQ, 2v80861**	**Date Test(s) Started:**	**16-SEP-2016**
Ordered By:	**Dr. Kris Cunningham**	**Date of Report:**	**14-OCT-2016**

Test(s) Requested: Comprehensive Arrhythmia Sequencing and Deletion/Duplication Panel

Genes Evaluated: ABCC9, AKAP9, ANK2, CACNA1C, CACNA2D1, CACNB2, CALM1, CALM2, CALM3, CASQ2, CAV3, DES, DSC2, DSG2, DSP, GPD1L, HCN4, JUP, KCND3, KCNE1, KCNE2, KCNE3, KCNE1L, KCNH2, KCNJ2, KCNJ5, KCNJ8, KCNQ1, LMNA, NKX2.5, PKP2, PLN, RANGRF, RYR2, SCN10A, SCN1B, SCN2B, SCN3B, SCN4B, SCN5A, SNTA1, TGFB3, TMEM43, TRDN, TRPM4, TTN

Result: **SEE INTERPRETATION**

Gene	Coding DNA	Variant	Zygosity	Classification
ANK2	c.3718 C>G	p.Pro1240Ala (P1240A)	Heterozygous	Variant of Uncertain Significance

No definitive pathogenic variants known to be associated with arrhythmia were identified by sequence analysis of the 46 genes on this panel. No deletion or duplication involving any of the 45 genes analyzed was found by concurrent targeted array CGH (ExonArrayDx). The CALM1 gene is not included on the Arrhythmia ExonArrayDx.

Interpretation: **This individual is heterozygous for variant of uncertain significance in the ANK2 gene.**

The Comprehensive Arrhythmia Panel includes sequence and deletion/duplication analysis of genes that cause various arrhythmia syndromes. Many of these genes code for ion channel proteins of the heart muscle that mediate the movement of sodium, potassium and calcium ions in and out of cardiac cells, as well as their associated regulatory factors and interaction partners. There are several different genetic arrhythmia disorders. Arrhythmogenic right ventricular dysplasia/cardiomyopathy (ARVC) affects the cardiac desmosome, which is a protein complex that maintains cell-to-cell connections and provides mechanical attachments between adjacent cells. ARVC is characterized by myocyte death and replacement by fat and fibrous tissue in the right ventricle, predisposing to ventricular tachyarrhythmia and sudden cardiac death (McNally et al., 2014; Nava et al., 2000). Brugada syndrome (BrS) is caused by abnormal ion channel function and is characterized by ST segment elevation on ECG (leads V1-3) in the absence of structural heart disease. BrS is associated with increased risk for syncope, ventricular tachyarrhythmia and sudden cardiac death (Fowler et al., 2009; Hedley et al., 2009; Brugada et al., 2014). Catecholaminergic polymorphic ventricular tachycardia (CPVT) is characterized by cardiac calcium channel dysfunction that is precipitated by stress-induced release of catecholamines (de la Fuente et al., 2008; Priori et al., 2002). Long QT syndrome (LQTS) is characterized by prolongation of the QT interval on ECG and is associated with increased risk for syncope, ventricular arrhythmia, and sudden cardiac death in individuals with normal heart structure (Goldenberg et al., 2008; Priori et al., 2004; Alders and Christiaans, 2015; Tranebjaerg et al., 2014). Genetic predisposition to a cardiac arrhythmia may occur as an isolated feature or may be part of a multisystemic disorder, such as Jervell and Lange-Nielsen syndrome, Timothy syndrome, Andersen-Tawil syndrome, Naxos disease, Carvajal syndrome and muscular dystrophy.

ANK2 Summary: The ANK2 gene is a member of the ankyrin protein family, which play a role in cell motility, activation, proliferation, contact, and maintenance of specialized membrane domains (MIM: 106410). Heterozygous pathogenic variants in ANK2 have been reported in association with Long QT syndrome (LQTS) (Mohler et al., 2003).

GeneDx DNA DIAGNOSTIC EXPERTS

Cardiology Genetics Report

Patient Name:	**CEYLAN, Raffi**	**GeneDx Accession No:**	**1638665**
Date of Birth:	**05-FEB-1973**	**Date Specimen Obtained:**	**16-JUL-2016**
Specimen Type:	**DNA**	**Date Specimen Received:**	**16-SEP-2016**
Submitters ID No:	**16SA198 MQ, 2v80861**	**Date Test(s) Started:**	**16-SEP-2016**
Ordered By:	**Dr. Kris Cunningham**	**Date of Report:**	**14-OCT-2016**

ANK2 p.P1240A: p.Pro1240Ala (P1240A) (CCC>GCC): c.3718 C>G in exon 31 of the ANK2 gene (NM_001148.4)

A variant of uncertain significance has been identified in the ANK2 gene. The P1240A variant has not been published as a pathogenic variant, nor has it been reported as a benign variant to our knowledge. This variant was not observed in approximately 6,500 individuals of European and African American ancestry in the NHLBI Exome Sequencing Project, indicating it is not a common benign variant in these populations. The P1240A variant is a semi-conservative amino acid substitution, which may impact secondary protein structure as these residues differ in some properties. This substitution occurs at a position that is conserved across species and in silico analysis predicts this variant is probably damaging to the protein structure/function. However, to our knowledge no studies have been performed to determine the functional effect of the P1240A variant.

Therefore, based on the currently available information, it is unclear whether this variant is pathogenic or benign. This result cannot be interpreted for diagnosis or used for family member screening at this time.

Recommendation:

1. It is recommended that any first-degree relatives receive continued clinical evaluation and follow-up.

2. Targeted testing of affected relatives could be considered to determine if the P1240A variant in the ANK2 gene segregates with disease in this family. If there are no affected relatives, targeted testing of this individual's parents could be considered to determine if the variant occurred de novo. Cumulative data about this variant, including multiple instances of segregation with disease and/or de novo occurrence may assist in further variant interpretation and classification.

3. Genetic counseling is recommended to discuss the implications of this test report, specifically the risk of recurrence for this family.

Resources: Patients willing to share their genetic and health data (de-identified for privacy) to advance knowledge and to connect with others with the same variant/condition can visit genomeconnect.org.

Methods: Using genomic DNA from the submitted specimen, the coding regions and splice junctions of the 46 genes (Only exons 1-44 for CACNA1C, only the KCNQ1-binding domains including Ser1570 residue for AKAP9, and excluding exon 6 of the PKP2 gene and the following genomic regions of the TTN gene: chr2:179527692-179527782, 179523898-179523982, 179523731-179523815) are enriched using a proprietary targeted capture system developed by GeneDx. These targeted regions are sequenced simultaneously by massively parallel (NextGen) sequencing on an Illumina platform with paired-end reads. Bi-directional sequence is assembled, aligned to reference gene sequences based on human genome build GRCh37/UCSC hg19, and analyzed for sequence variants. Capillary sequencing is used to confirm all potentially pathogenic variants and to obtain sequence for regions where fewer than 15 reads are achieved by NextGen sequencing. Concurrent deletion/duplication testing was performed using exon-level oligo array CGH (ExonArrayDx) for most of the coding exons of the requested genes, except for CALM1. KCNE1L and SCN1B have gene level resolution; exon level events may not be detected. Data analysis is performed using gene-specific filtering. Probe sequences and locations are based on human genome build GRCh37/UCSC hg19. The array is designed to detect most intragenic deletions and duplications. Confirmation of copy number changes is performed by MLPA, qPCR, or repeat array CGH analysis. Sequence and array CGH alterations are reported according to the Human Genome Variation Society (HGVS) or International System for Human Cytogenetic Nomenclature (ISCN) guidelines, respectively. Benign and likely benign variants, if present, are not included in this report but are available upon request.

This supplement provides evidence to support the classification of each reportable variant in the attached result report. This information is provided as a resource and may not be inclusive of all available information used by GeneDx for variant classification. The variant classification does not rely solely on any one of the individual criterion provided below. In addition, each criterion is weighted differently to derive the classification. This information is subject to change over time and may differ from what is currently available. This supplement is provided upon request to ordering providers. GeneDx has already conducted a thorough analysis of the data at the time testing was ordered and does not provide additional support to providers who have questions about the tools used in variant analysis and interpretation for a specific case. Results should always be interpreted in the context of the patient's clinical presentation.

Blank fields indicate that no data was available at time of analysis.

Data from the 1000 Genomes Project has been modified by GeneDx to exclude related individuals. For more information about the specific populations included in the 1000 Genomes Project, please see http://www.1000genomes.org (McVean et al., 2012).

The Exome Aggregation Consortium (ExAC) provides a beta-version of a set of exome sequencing data from a variety of large-scale sequencing projects (Lek et al., 2016). The ExAC set includes data from individuals who were recruited for disease-specific studies, including cancer and cardiovascular diseases. Genotype quality metrics and site quality metrics for a specific variant are available at http://exac.broadinstitute.org.

Frequency/Catalog Information

dbSNP - NCBI repository for single base nucleotide substitutions and short deletion and insertion polymorphisms

1000G - Variant allele frequency among 2500 individuals included in the 1000 Genomes project, a catalog of human genetic sequence variation obtained through genomic sequencing (Percent values in parentheses)

1000G_Highest - Highest reported percentage frequency of a variant in any 1000G sub-population

1000G_Highest_Sub - Sub-population referenced in 1000G_Highest (AMR=Admixed American, EAS=East Asian, SAS=South Asian, AFR=African, EUR=European)

ExAC_Freq - Variant allele frequency among approximately 60,000 individuals included in the Exome Aggregation Consortium (ExAC) dataset, a catalog of human genetic sequence variation obtained through exome sequencing (Percent values in parentheses)

ExAC_Latino - ExAC variant frequency (in percent) for individuals of Latino ancestry

ExAC_NFE - ExAC variant frequency (in percent) for non-Finnish individuals of European ancestry

ExAC_AFR - ExAC variant frequency (in percent) for individuals of African ancestry

ExAC_EAS - ExAC variant frequency (in percent) for individuals of East Asian ancestry

ExAC_FIN - ExAC variant frequency (in percent) for Finnish individuals of European ancestry

ExAC_Other - ExAC variant frequency (in percent) for individuals of other ancestry

ExAC_SAS - ExAC variant frequency (in percent) for individuals of South Asian ancestry

ExAC_Hom - The number of individuals in ExAC who are homozygous for the variant

Information on Prediction Scores

PROVEAN (Protein Variation Effect Analyzer) - predicts whether an amino acid substitution or indel affects the biological function of a protein using a delta alignment score from -14 to +14 (more negative=more damaging) with a predefined threshold of -2.5. If the PROVEAN score is equal to or below -2.5, the variant is predicted to have a deleterious effect. If the PROVEAN score is greater than -2.5, the variant is predicted to have a neutral effect.

MutTaster_Score - Represents the strength of the calculation matching a simple, automated prediction based on population statistics and ClinVar data (Example: A high-scoring variant may be both calculated to be damaging and has a 'damaging' flag in ClinVar.) A high score does NOT indicate a high probability of accuracy. Predictions (in parentheses) are: 'A' - Disease-causing Automatic (known pathogenic), 'D' - Disease-causing, 'N' - Polymorphism, 'P' - Polymorphism Automatic (known benign).

Note that the in silico scores used by GeneDx are precomputed and may change over time. In silico models use algorithms that predict the effect a variant may have on the protein, but they do not provide direct evidence regarding the actual impact on protein structure or function. In silico models should be interpreted with caution and only be used in combination with other available evidence to support the classification of any variant. CADD (Combined Annotation Dependent Depletion) is also used by GeneDx to evaluate the deleterious effect of a single nucleotide variant (SNV) or indel.

Interpro_Domain - Domain annotations come from the Interpro database. The number in parentheses reflects how many times Interpro has assigned the variant position to that domain, typically derived from different predicting databases.

ClinVar - Classification of variant in ClinVar database, an NCBI archive of human variants with supporting evidence of phenotypic association.

GeneDx DNA DIAGNOSTIC EXPERTS

Cardiology Genetics Report

Patient Name:	**CEYLAN, Raffi**	**GeneDx Accession No:**	**1638665**

Limitations: Genetic testing using the methods applied at GeneDx is expected to be highly accurate. Normal findings do not rule out the diagnosis of a genetic disorder since some genetic abnormalities may be undetectable with this test. Neither sequencing nor exon-level array CGH can reliably detect mosaicism and/or chromosomal aberrations. Deletions/insertions of 5 bp or more are not reliably detected by the NextGen sequencing methodology and deletions/insertions of less than 500 bp are not reliably detected by array CGH. Rarely incidental findings of large chromosomal rearrangements (>3Mb) outside the gene of interest may be identified. Some genes have inherent sequence properties (for example: repeat, homology, or pseudogene regions, high GC content, rare polymorphisms) that may result in suboptimal data, and variants in those regions may not be reliably identified. False negative results may also occur in the setting of bone marrow transplantation, recent blood transfusion, or suboptimal DNA quality. The chance of a false positive or false negative result due to laboratory errors incurred during any phase of testing cannot be completely excluded. Interpretations are made with the assumption that any information provided on family relationships is accurate. Consultation with a genetics professional is recommended for interpretation of results.

Disclaimer: This test was developed and its performance characteristics determined by GeneDx. It has not been cleared or approved by the U.S. Food and Drug Administration. The laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for clinical purposes. It should not be regarded as investigational or for research.

E-06 · undated · Regional Supervising Coroner's email to the widow

Document: email of David A. Cameron, MD, LLB, CCFP, Regional Supervising Coroner, North Region, Sudbury — subject "FW: EXT: RE: 16SA198 CEYLAN, R DNA Results" — attaching "CEYLAN, Raffi PM Report.pdf" and "CEYLAN, Raffi Tox.pdf". **Held as:** transcription (package, gallery `20260106_144108.jpg`). **Status:** OCR/transcription only.

> "Cause of Death: No anatomic or toxicologic cause of death consistent with cardiac arrhythmia" "This means that no abnormalities were found and so a cardiac arrhythmia is the most likely cause. The cardiac gene testing done in the U.S. shows a 'variant of uncertain significance in the ANK2 gene.'"

Establishes: that the coroner's office read the absence of findings as the finding. **Does not establish:** the reasoning behind that step. No document in the corpus sets it out.

E-07 · 10 May 2019 · Release of the coroner's package

Document: cover letter, Office of the Chief Coroner, Sudbury, Emily Groot MD, to Ms. Lucy Ceylan; 16-page package; released under s.18(7) of the Coroners Act. **Held as:** transcription (package p.1). **Status:** OCR/transcription only. Addressed to Raffi's sister, not to the estate trustee.

Establishes: that the family obtained the death-investigation record directly, three years after the death.

E-08 · 6 November 2026 · Corporate Profile Report, NORTHERN EXPOSURE DECKS & FENCES LTD.

Document: Ontario Ministry of Public and Business Service Delivery Profile Report, as of 31 December 2016, Transaction APP-A11300127133, 8 pages, certified "a true copy of the record", generated 6 November 2026 08:27. **Held as:** document + verbatim transcription, `NODE-02-SEPT-OCT-2016/PROFILE-REPORT-2003951.txt`. **Status:** produced and read in full.

> "Name: NORTHERN EXPOSURE DECKS & FENCES LTD. · Ontario Corporation Number (OCN): 2003951 · Status: Active · Date of Incorporation: June 28, 2001"
>
> "Minimum Number of Directors: 1 / Maximum Number of Directors: 7" "Active Director(s) — Name: IVANA HRVATIN · Resident Canadian: Yes · Date Began: September 30, 2016" "Active Officer(s) — IVANA HRVATIN · Position: President · Date Began: September 30, 2016" "IVANA HRVATIN · Position: Secretary · Date Began: September 30, 2016"

Document List, thirteen filings: twelve read **PAF: RAFFI CEYLAN — OFFICER / DIRECTOR**, from the Initial Return of 20 July 2001 (OCR prints "July 20, 2001"; the list's own line date) through Annual Return 2013.

Establishes: fifteen years of one filing authority; one person holding every office from 30 September 2016. **Does not establish:** when Raffi ceased to be a director (no former-director field); any share position (no share field in the eight pages).

E-09 · 30 September 2016 · The Notice of Change

Document: line 1 of the same Document List.

> "CIA - Notice of Change PAF: BARTON J. SEGUIN - OTHER Effective Date: September 30, 2016"

Held as: the Profile Report above. **Status:** produced. **The instrument behind it — resolution, consent, signature — is NOT HELD anywhere in this corpus.**

Establishes: that the registry records a person classified as holding no office as the person who authorized the change of directors and officers, effective 30 September 2016. **Does not establish:** who signed what, on what date, on whose authority.

E-10 · faxed 14 September 2016 · Sun Life transfer-of-ownership form

Document: the instrument that would connect policy to deposit. **Status: NOT HELD in unredacted form.** A redacted copy exists in Frank's own set; the Longo affidavit records that Potvin undertook to produce the form unredacted and did not [BC ¶H.4].

Establishes: only the fax stamp date, 2016/09/14. **Does not establish:** the policy number, the designation, the signature, the signer, or the date signed. This is the single largest gap in the chain.

E-11 · statement period ending 30 November 2016 · TD business chequing statement

Document: TD Canada Trust BUSINESS CHEQUING, NORTHERN EXPOSURE DECKS & FENCES LTD., account `0084 7411-5001963`. Two copies read (`1000088787`, `1000087951` / `image009`). **Status:** OCR of the image; the primary image is `muse:muse 660` and is not openable by this session.

```
BALANCE FORWARD   SEP30   11,248.27 (overdrawn)
NSF               432.00  OCT04   10,816.27
UNION GAS LTD BPY  51.75  OCT18   10,868.02
DEPOSIT                           10,686.32 -> balance column
charges: 5.00 + 2.00 + 25.00 + 68.60 = 100.60
closing balance printed            596,441.78
check: 607,228.70 - 10,686.32 - 100.60 = 596,441.78   EXACT
```

> deposit line: "607,228.70" · monthly average credit balance **$19,240** · "NEXT STATEMENT DATE IS NOV 30/16"
>
> Copy B line 74: "$11,248.27OD **607,842.40**"

Establishes: the sum entered the corporation's business account; the account was overdrawn by $10,686.32 immediately before; the balance after the deposit was $596,441.78; the money left within the period (average balance $19,240). **Does not establish:** the deposit date printed on the statement; where the money went; what 607,842.40 is. That figure is used in no arithmetic in this package.

E-12 · 16 November 2016 · The sheet Seguin handed over

Document: two-page "LIST OF ESTATE ASSETS/DEBTS", personal (p.1) and corporate (p.2), `1000082583.jpg.txt`. Handwritten heading: "Sheet that was provided [by] Bart Seguin to my mother and [Julie] during their meeting with him on Nov[ember 16, 2016]". **Status:** OCR only.

line	item	figure as printed
25	Residence (50%), 4967 4th Conc.	195,000.00 "Re value"
33	block subtotal (insurance proceeds / RRSP / non-registered / TFSA, Empire Life)	349,468.93
63	TOTAL ESTIMATED PERSONAL [OCR damaged]	**167,488.09**
69	Business: equipment / tools / dump truck	20,000.00 approx.
70	Receivables to bank	14,978.15 collected and deposited
71–75	INSURANCE PROCEEDS SUN LIFE	lines damaged; total **634,978.15** received
78	OVERDRAFT TO BANK ACCT NO. 7411-5001963	25,664.47 "paid out of funds received"
84	Business liabilities subtotal	35,289.86
95	TOTAL ESTIMATED BUSINESS ESTATE ASSETS [OCR damaged]	167,176.38

Four of the printed totals are legible; the lines that compose them are not, so no computed total is carried out of this sheet anywhere in this package. Note that the 349,468.93 block and the 167,488.09 personal total cannot both be the personal estate, and the record does not say which lines sit inside which.

Establishes: the estate's lawyer's own figure for the insurance proceeds, and the family's net position as of the first weeks after the death. **Does not establish:** how 634,978.15 decomposes (component lines damaged in OCR); why it is $27,749.45 above the bank deposit.

E-13 · 16 November 2016 · Transcript of the meeting in Seguin's office (fragment)

Document: `1000087932.jpg.txt`, transcript lines covering 19:38–32:10 of the recording, with the family's handwritten annotation layered on the page. Quote below is transcript only; annotations are the family's and are excluded. **Status:** OCR of an annotated fragment. **The audio is NOT HELD** — attested by its maker, described in the affidavit as Exhibit 19 in Lucy Ceylan's possession.

> "@19:38 — Mom 'Ok how is she going to pay this' … what insurance?"
>
> "@20:11 — Bart 'Her name is not there'. @20:14 — Mom 'how come it is there now'? @20:15 — Bart 'It's not, it's not, it's with the company'."
>
> "@21:03 — Bart '… if something will show that she is taking the money, I have an obligation to stop it. Right. I will not tolerate anything that'll be illegal… there is nothing that is been put together that'll show her as having a personal interest in this money at all.'"
>
> "Raffi had a policy on his life that was owned by his [corporation]… the corporation is the beneficiary… Everything has been received in trust, and put in an account that is showing to be in trust for Ashton or its in the company."
>
> "@25:21 — Bart 'How do we prove it, without Darrell acknowledging it? If Darrell gives us something that says that out of the x amount of dollars... I know what came in cuz i closed the deal'."

Establishes: the lawyer's own account of the money as corporate and held in trust for Ashton; that he states he closed the real-estate transaction in which Raffi and Darrell Lauzon bought the property. **Does not establish:** the reason the deposit went to the corporate account; what happened after 32:10 of the recording.

E-14 · written account · Julie Triferis

Document: `1000087934.jpg.txt` — the witness's own written account. **Status:** OCR only; a witness attestation, not a corroborated fact.

> "With Betty's permission I told her I was going to voice record our entire meeting with Bart. And I did so!"
>
> "On or about Augest 2016 Bart Seguin then showed up to Raffi's house and watched me load my stuff into a truck and when I was finished he had me surrender my house keys to him… Raffi's computer was inside his house and left on the kitchen counter."
>
> "…I was then told by Bart Seguin during [a meeting with] Lucy Ceylan in his office… that Ivana has the computer, that I was correct, Bart took it from Raffi's house the day I moved out and while he locked it up!!!"

Establishes: that a named witness makes this claim in writing. **Does not establish:** that it is true. No document in the corpus corroborates or contradicts it, and no denial is held.

E-15 · 16 February 2017 · Notice of Objection and CV-17-25300

Status: NOT HELD. Not as an image, not as OCR. Requested from the Windsor courthouse; the Statement of Issues for CV-17-25300 was requested in the same letter and has not arrived.

The date is established twice, independently:

> Minutes of Settlement ¶5: "Betty filed a Notice of Objection, dated February 16, 2017 (the 'Objection'), objecting to Ivana attempting to eet [OCR: act] as estate trustee for the Estate, and commenced the Application in Court File No. CV-17-25300"
>
> Frank's court-records request: "...documents from the civil suit that was commenced [date] February 16, 2017 against Raffi's estranged wife, Ivana Hrvatin (aka Ivana Ceylan)."

Establishes: the date and the existence of the objection and the file number. **Does not establish:** its grounds, exhibits or signature — except as described by opposing counsel in E-16.

E-16 · 28 April 2017 · McTague Law Firm letter to Barton J. Seguin

Document: D. M. Sundin, McTague Law Firm LLP, our file 67863, to Barton J. Seguin, Shibley Righton LLP, WITHOUT PREJUDICE, "VIA EMAIL & HAND DELIVERY". **Held as:** full text, `20260118_184959.jpg.txt` (p.1) and `20260118_184953.jpg.txt` (p.2). **Status:** OCR, full text held.

> "We have now had the opportunity to discuss settlement with our client, Betty Ceylan, of the issues raised in the Notice of Objection filed by her in this matter. We enclose a copy of the Notice of Objection for ease of reference. Betty is willing to settle her dispute regarding **Ivana's authority to be either the beneficiary or the Trustee** of Raffi's Estate on the following terms:"
>
> "Failing a response from you within ten (10) days of the date of this letter, we have been instructed to commence an Application and to seek costs for same from Ivana."

Twelve terms, including: an Application on consent that Ivana "is specifically excluded from acting as Estate Trustee or taking as a beneficiary, pursuant to a Separation Agreement that specifically excludes her"; "an independent party to be agreed upon shall be appointed to act as Estate Trustee"; "Control of Raffi's social media accounts is to be surrendered to Lucy Ceylan"; all personal effects to the trustee; costs to the estate; supervised visitation; reimbursement to Darren Janke and to Crystal Rivard (~27 hours); return of the calligraphy pen and ink case, a camera, a painting and lumber. **Term 2 of the twelve falls across the page break and is missing from the record.**

Establishes: the Objection's ground, stated by opposing counsel in writing and never retracted; the twelve demands. **Does not establish:** term 2; the Objection's own text.

E-17 · 9 December 2017 · Minutes of Settlement

Document: four pages, between Bercuhi (Betty) Ceylan and Ivana Hrvatin, witnessed by David M. Sundin and Barton J. Seguin. **Held as:** OCR, `20260119_182134` (p.1), `_182129` (p.2), `_182124` (p.3), `_182118` (p.4). **Status:** OCR, full text held.

> "IN WITNESS WHEREOF, the Parties hereto have set their respective hands, as witnessed, as of the 9th day of December, 2017." [OCR: `9"`]
>
> "7. Betty shall forthwith withdraw the Objection;" "9. There shall be an Order … declaring that Ashton is the sole beneficiary of the Estate and that a trust for Ashton be set up in accordance with paragraph 4(c) of the Last Will and Testament of Raffi, dated November 11, 2007 (the 'Trust')…" "10. … (i) Ivana shall be the Trustee of the Trust; (ii) Ivana shall not take any compensation…; (iii) Ivana shall provide a financial update on an annual basis to Betty… and to the Office of the Children's Lawyer; (iv) … by on or before March 31, 2019, and each year thereafter." "13. The Estate shall make payment to Betty of the all-inclusive sum of $60,000.00, on account of Betty's Claim for recovery of certain loans she made to Raffi and on account of costs for the Application;" "14. Within thirty days, Ivana shall cause Raffi's Facebook page to be shut down;" "15. … Ivana shall, at the expense of the Estate, install a tombstone at Raffi's grave … 'Beloved Son, Brother, and Father';" "16. … Should the lithograph be valued at more than $500.00, it shall be turned over to Ivana, who shall preserve it for Ashton;" "17. Ivana shall release a certain calligraphy set to Betty forthwith…" "22. … they shall indicate only that the 'litigation has been discontinued', and shall give no further or other indication of the outcome;"

Establishes: what was actually agreed; the settlement sum; the trust and its reporting obligations; that Ivana remained trustee. **Does not establish:** why the exclusion and the independent trustee disappeared from the demands; whether any of ¶11–¶17 was performed.

E-18 · December 2017 · Form 74.4 and the Certificate of Appointment

Document: Application for Certificate of Appointment of Estate Trustee with a Will (Form 74.4), sworn December 2017 (day illegible in OCR); Certificate of Appointment sealed 2017 (day and month illegible). **Held as:** OCR, `1000087595.jpg.txt`, `20260106_111522.jpg.txt`, `20260106_111441.jpg.txt`. **Status:** OCR only.

> "VALUE OF ASSETS OF ESTATE — Personal Property $27,600.00 · Real estate, net of encumbrances $80,514.00 · **Total $108,114.00**"
>
> "CERTIFICATE OF APPOINTMENT OF ESTATE TRUSTEE WITH A WILL — Applicant: Ivana Ceylan — 219 Branton Crescent, Tecumseh, ON N9K 1G1 — Water Quality Technician"
>
> Backsheet: "BARTON J. SEGUIN / SHIBLEY RIGHTON LLP … LSUC #46519C / Lawyers for the Applicant(s) / File #2161768"

Establishes: the estate value sworn to the court; the identity of the trustee appointed; counsel of record; that the will attached is the one of 11 November 2007. **Does not establish:** the exact signature date; the estate file number (trailing character illegible in OCR); any component attribution within the $108,114.00.

E-19 · 11 November 2007 · The will that was probated

Document: Last Will and Testament of Raffi Ceylan, executed 11 November 2007; 12-page signed copy. **Held as:** OCR of the pages, `lucy_ocr_out/…Ceylan-1.pdf_pg_*.txt`. The PDF itself is not readable by this session. **Status:** OCR only. Executed page reads "subscribed my name this 11th November, 2[0]0[7]".

Terms: ¶2 nominates his wife as estate trustee. ¶4(b) gives the residue to his wife if she survives him 30 days. ¶4(c) makes provision for the children by trust. ¶5–6 express the children's entitlement at age 25. ¶9 appoints "my sister-in-law, ELENA O'NEILL" as substitute decision-maker for the minors, then "my mother-in-law, LYDIA ANNA HRVATIN". **¶3 of this will is struck by the 13 March 2018 order and no readable copy of ¶3 exists on this box.**

E-20 · 13 March 2018 · Order on consent (Howard J.)

Document: Ontario Superior Court of Justice, Windsor; "TUESDAY, THE 13th DAY OF MARCH, 2018"; heard on the consent of the parties. **Held as:** OCR, `1000089660.jpg.txt`, `1000085857.jpg.txt`, `image004.jpg.txt`. **Status:** OCR, two independent copies read.

> "1. THIS COURT ORDERS AND DECLARES that Ashton Ceylan is the sole beneficiary of the Estate of Raffi Ceylan…"
>
> "2. THIS COURT ORDERS that the Estate shall be administered without reference to paragraphs 3 and 4(b) of the Last Will and Testament of Raffi Ceylan, dated November 11, 2007 (the 'Will'), which shall hereby be of no force or effect, and that any sums to which Ashton Ceylan is entitled as the residual beneficiary of the Estate shall be administered in accordance with the trust provisions set out in paragraph 4(c) of the Will… (i) Ivana Hrvatin shall be the Trustee of the Trust…"
>
> "3. THIS COURT ORDERS that the balance of the Application is dismissed with prejudice and without costs."

Establishes: that two paragraphs of a will probated four months earlier were declared of no force or effect by consent; that the residue was redirected to the child's trust; that Ivana remained trustee. **Does not establish:** what ¶3 of the will contained; the motion record filed as consent.

E-21 · February 2018 · Full and Final Mutual Release

Document: "BERCUHI CEYLAN, also known as BETTY CEYLAN … Applicant and IVANA CEYLAN, also known as IVANA HRVATIN, and ELENA O'NEILL … Respondents — FULL AND FINAL MUTUAL RELEASE". Day blank; month February 2018. **Held as:** OCR, `1000088799.jpg.txt`, `20260120_080925.jpg.txt`.

> "(iii) Lucy, who is a non-party, being bound by the terms of this Full and Final Mutual Release;" "(iv) A dismissal of the Application in Court File No. CV-17-25300 on a with prejudice and without costs basis;"

Establishes: that a person who was never a party to CV-17-25300 is inside the mutual release; the consideration. **Does not establish:** the day of execution; Lucy Ceylan's consent to being bound (¶20 of the Minutes has Betty cause her to sign; no signed copy by Lucy is held).

E-22 · 5 December 2017 · Mediation Brief of the Applicant (167 pages)

Document: Mediation Brief of the Applicant in CV-17-25300, dated 5 December 2017, 167 pages. **Held as:** OCR recovered from a single JPEG (`1000090238.jpg`) plus the node addendum `NODE-06-ADDENDUM-MEDIATION-BRIEF.md`. **Status:** OCR held; the 167 pages were found inside one image file.

> "The total amount owing on the loans to Betty total the sum of $58,512.16." (plain reading of the brief's OCR text) “Kindly confirm that the Estate will pay the outstanding sum of $58,512.16 to Betty.”

The $60,000 payment in ¶13 of the Minutes exceeds that claim by **$1,487.84** (60,000.00 − 58,512.16) — arithmetic on the two figures, not a costs figure quoted from a document.

Establishes: the applicant's pleaded case at length, and the sizes of the two money claims. **Does not establish:** the respondent's answer (not held).

E-23 · 3 October 2017 · The procedural order the settlement short-circuited

Document: Order of Howard J., on consent; `20260119_180106.jpg.txt`.

> "3. The Parties are to schedule a Mediation session by on or before October 27, 2017, with the Mediation session to be held by on or before December 1, 2017 …"
> "… Factums and Brief of Authorities by on or before March 9, 2018."

Establishes: the court-ordered timetable — mediation by 1 December 2017, hearing set for 19 March 2018. The Minutes are dated 9 December 2017, eight days after the mediation deadline, and the consent order came 13 March 2018, six days before the hearing was due.

E-24 · correspondence · The courthouse on the separation agreement

Document: registrar's correspondence, `Screenshot_20260128_120722_Gallery.jpg.txt`.

> "the Certificate of Appointment of Estate Trustee, Application Form for Estate Trustee, last known will, as well as the entire contents of civil file CV-17-25300" "The Separation Agreement was never filed with us."

Establishes: that the separation agreement — the instrument the April 2017 position relied on to exclude Ivana — was never filed with the court, in the courthouse's own words.

E-25 · 13 November 2026 · Office of the Inspector General of Policing, Decision 26-1234

Document: Decision 26-1234, Office of the Inspector General. **Secondary** — a decision, not a primary record.

> "2016, under unexplained circumstances), control of Northern Exposure Decks and Fences Ltd. was transferred on paper." "The Filing Discrepancy: The corporate registry records the 'Person Authorizing Filing' (PAF) for this change as Barton J. Seguin, explicitly classified by the system as 'OTHER' holding no official office or directorship in the company." "Financial Outcome: This filing placed corporate control and a subsequent $607,228.70 in life insurance proceeds (under a Sun Life policy) under the sole control of Ivana Hrvatin, a non-officer who previously held no recorded position in the company."

Establishes: that an Ontario oversight body adopted the registry facts in writing on 13 November 2026. **Does not establish:** the conclusion that the money reached Ivana Hrvatin personally — the bank document in E-11 shows it entering the corporation's account and no document here shows it reaching her.

E-26 · 13 November 2026 · The canary token geography ledger

Document: page pull of every fired campaign token from the token service's own per-token history API, 13 November 2026 15:54 EST; reconciliation against the mailbox sweep; per-house geography. **Held as:** `/home/atlas/CANARY-EVAL-2026-11-13/deliver3/token-geography-summary.md` with `token-geography-ledger.csv` (1,328 tokens), `token-geography-tokens.csv`, `token-geography-delta.csv` (191 rows) and `_numbers.json`. **Status:** machine-generated from the service's API; every figure on this page is read from those files.

```
campaign tokens fired          1,328
firing rows (page pull)        3,421
firing rows (mailbox sweep)    2,531   undercounts by 890 (+35.2%)
distinct source addresses        571
distinct rendered cities         125
first firing (EST)      2026-02-16 00:28:49
last firing  (EST)      2026-11-13 15:34:42
```

CIBC	18	1	5	3	Toronto (12) / Google
OCC	5	4	4	1	Toronto (5) / Microsoft

Establishes: that 1,328 uniquely-tokened instruments were opened 3,421 times, from 571 source addresses rendering to 125 cities, between 16 February and 13 November 2026; and the per-house distribution of those openings, including 71 openings on the Windsor Police instrument. **Does not establish:** who sat at each address. Attribution past the egress is a separate question, not answered here and not asserted in Part I. **Note on the limits:** eight tokens sit on the service's 50-row page cap, so 50 is a floor rather than a count for those; the sweep figure is retained for them, and the one inverse case is kept in the delta file rather than hidden.

ANNEX GAPS — named, not filled

#	Document named in the record	Status
G-01	Sun Life transfer-of-ownership form, unredacted	NOT HELD — undertaking unperformed
G-02	Instrument behind the 30 Sep 2016 Notice of Change	NOT HELD

Part III — The verified fax list

Every number below was read off the organisation's own page on 17 November 2026 and is stored with that page's URL and the surrounding text in *fax-list.csv*. Batching for sending: *batches/*, 50 rows to a file. Numbers the machine could not re-confirm at build time are marked in the appendix status column and are not to be dialled.

ORD-0266 - Verified fax list

Built 2026-11-17. **154 Canadian and 38 United States organisations** with a published fax number read off the organisation's own page, plus 4 in-bucket numbers in other countries and 32 appendix numbers outside the counted buckets. Total **229** numbers across 80 distinct source pages.

Nothing here is inferred, guessed or copied from a directory: every row carries the page URL and the surrounding text in `fax-list.csv` (`evidence_quote`). All 80 source pages were re-requested when the list was built; 74 answered HTTP 200. The 6 that did not are appendix sources (PDF-index pages that answer only to a browser, or dead links) and are marked in `source_status` below - they must not be dialled until re-checked. 53 numbers were seeded from the FAXWAVE-2026-11-14 roster and re-confirmed against the organisation's own page.

Standing veto honoured: there is no Windsor Police number anywhere in this list.

The military bucket is the Canadian Armed Forces: every number is a published contact on the Department of National Defence's own media contact list, read from the live page; no base switchboard was guessed and no number was derived. The Military Police Complaints Commission publishes a telephone line only and is therefore absent rather than invented.

Counts

	Police	AG / Justice	Sol. Gen.	Courts / registries	Oversight	Oversight (law soc.)	Media	Military	Total
Canada	53	71	1	19	5	1	4	0	154
United States	0	35	0	0	1	0	2	0	38
Other countries	0	0	0	1	0	0	3	0	4
Total	**53**	**106**	**1**	**20**	**6**	**1**	**9**	**0**	**196**

Appendix (not counted above): 32 numbers - Canada 7, United States 6, Switzerland 6, UK 5, South Africa 2, Belgium 2, Ireland 1, France 1, Lebanon 1, Italy 1.

Batches of 50 for sending are in `batches/`.

Quality gate - 225 of 229 rows pass, 4 flagged and held out of the batches

Every row was checked mechanically against its own captured quote: the fax number must sit inside the quote and carry a fax label (fax / facsimile / télécopieur) within 70 characters of it. Rows that fail are listed here with the reason and are **not** in `batches/`. They stay in `fax-list.csv` with the reason in the `flag` column rather than being dropped.

Organisation	Fax	Bucket	Why it is held
American Civil Liberties Union (ACLU) - national office	(212) 549-2652	Outside the six buckets (already verified - appendix)	CHECK - the captured window shows only telephones; the fax label is not in the quote. Re-read the ACLU contact page before dialling.
HI (Handicap International / Humanity & Inclusion)	+33 4 78 69 79 94	Outside the six buckets (already verified - appendix)	CHECK - the number is not inside the captured quote (window truncated). Re-read the HI contact page before dialling.
Médecins Sans Frontières — MSF International (Geneva)	+41 22 849 8404	Outside the six buckets (already verified - appendix)	CHECK - the number is not inside the captured quote (window truncated). Re-read the MSF contact page before dialling.
Saskatoon Police Service	1-800-465-7166	Police services	BAD EXTRACT - this is the Equifax credit-bureau line, scraped off a crime-prevention page that lists it beside a police contact. Not a police fax. Do not dial.
